

ATI Spintronics Workshop Program  
November 15, 2017  
TKP Garden city Ochanomizu

Theme: Quantum transport, Graphene, Superconductor and Majorana

13:30 - 14:30 「Synthetic spin orbit interaction for Majorana devices」  
Lauriane Contamin  
Ecole normale superieure

14:30 - 14:45 Coffee Break

14:45 - 15:45 「Helical order in one dimensional semiconductors」  
(Tentative)  
Peter Stano  
RIKEN, Center for Emergent Matter Science

15:45 - 16:00 Coffee Break

16:00 - 17:00 「Graphene-Superconductor Hybrids:

characterization and applications」

Ivan V. Borzenets  
School of Engineering, The University of Tokyo

17:30 - Party

公益財団法人 新世代研究所  
FOUNDATION ADVANCED TECHNOLOGY INSTITUTE
